Figure 3 shows the results of the regression analysis. The results show that the regression coefficient for the variable "ios" is positive and significant, indicating that the use of ios is positively related to the dependent variable. The regression coefficient for the variable "com" is also positive and significant, indicating that the use of com is positively related to the dependent variable. The regression coefficient for the variable "ios" is positive and significant, indicating that the use of ios is positively related to the dependent variable. The regression coefficient for the variable "com" is also positive and significant, indicating that the use of com is positively related to the dependent variable.
